LT SARDINE & ANCHOVY MEAL

Key Points:

- ✓ 70% protein

Product Description

This LT Sardine & Anchovy meal is produced primarily from sardine but includes anchovy as a by-product of the fishing technique used. Produced by the cooking, low temperature drying and grinding of fresh fish it contains 70% protein and has a digestibility of 94%. Packed full of amino acids and with added antioxidants it will be an excellent addition to any base mix

LT Sardine & Anchovy Fish Meal is darker than most fish meals available and has a strong, pungent fish meal smell that is an excellent attractor in any base mix. We recommend you can include up to 500kg/kg in base mixes.

Country of Origin: Mauritius

Physical Properties

Colour: Brown
Texture: Granular powder.
Odour: Slightly fishy
