**Product Description**

Active Boost - AVT24 from Target Baits is designed to help support immune function, wound healing, tissue repair and overall health.

Where angling pressures become high carp will actively seek out nutritional baits which offer a complete balanced, nutritional profile in their diet. When Active Boost - AVT24 is added to your base mix it will provide optimum nutritional performance, to help benefit the carp's body for happier, healthier fish.

Such baits can become habit-forming with seemingly additive powers. As the dietary benefits are experienced by the fish, the fish with the largest energy efficiency and dietary requirements push out the smaller size carp, when the bait is repeatedly introduced over a period of time. At this stage the largest fish tend to monopolize the bait and will eat it in preference to other food and less nutritionally balanced baits.

Supplying a high nutritional value Active Boost - AVT24 will help to consistently produce big carp again and again.
