

## TARGET BAITS

# TITANIUM WHITE

### Key Points:

- ✓ White Dye

### Product Description

A high quality white dye used to increase the attraction potential of products to which it is applied.

Country of Origin: Czech Republic

### Physical Properties

Appearance: Powdered solid  
Flavour & Odour: Tasteless and Odourless  
Colour: White

### Chemical Properties

pH (1% soln/water): Not applicable.  
Boiling Point: 2750°C (4982°F)  
Melting Point: 1855°C (3371°F)  
Critical Temperature: Not available.  
Specific Gravity: 4.26 (Water = 1)  
Vapor Pressure: Not applicable.  
Vapor Density: Not available.  
Volatility: Not available.  
Odor Threshold: Not available.  
Water/Oil Dist. Coeff.: Not available.  
Ionicity (in Water): Not available.  
Dispersion Properties: Not available.  
Solubility: Insoluble in cold water, hydrochloric acid, nitric acid, diluted sulfuric acid, organic solvents.  
Soluble in hot concentrated sulfuric acid, hydrofluoric acid, alkali.
