

TARGET

THREONINE

Key Points:

- ✓ Essential amino acid

Product Description

Threonine (α -amino- β -hydroxybutyric acid) is an essential amino acid and the third limiting amino acid in swine and poultry diets. The bioactive molecule plays vital roles within the animals body such as:

- Aiding protein synthesis
- Assisting energy metabolism
- Help support nutrient absorption

Physical Properties

Appearance: White/ Light Brown Powder

Nutritional Analysis

Threonine	98%
Protein	73%
