

TARGET BAITS CPSP 90

Key Points:

- ✓ Enzyme Treated
- ✓ Low Oil Content
- ✓ Pepsin Protein Digestibility In Excess Of 97%
- ✓ 80% Water Soluble

Product Description

CPSP® 90 is a hydrolysed fish protein obtained by a unique process designed by Copalis. Fresh fish by-products are hydrolysed using non-GMO/natural enzymes. The hydrolysed fish protein is then flash-pasteurized and spray-dried, produced from whole fish, this process results in a highly attractive, nutritionally valuable meal that has a water solubility of 80%.

Country of Origin: France
